YAGEPreneurs, STEPreneurs Emerge

FEEDBACK

From Trainees p16

From the Trainers p28

**'OkowaPlus
is a Lifetime
Opportunity'
p23**

From His Excellency

The debut of this Newsletter is another significant development in our Job and Wealth Creation Scheme. In the six months that the Scheme has been in operation, we have witnessed remarkable progress in our unrelenting quest to fulfil our campaign promise of prosperity for all Deltans.

It is gratifying that the coming of this Newsletter coincides with the passing-out activities/ceremony of the first set of the first batch of trainees under the Youth Agricultural Entrepreneurs Programme (YAGEP) and the Skills Training and Entrepreneurship Programme (STEP).

As with all other mass communication vehicles, I expect this Newsletter to perform the traditional roles of information, education and agenda setting. Through this medium, Deltans should be properly and adequately informed of the policies, activities and programmes of the Job and Wealth Creation Scheme to enable them understand it better and make informed commentaries/choices.

I also look forward to comments from beneficiaries even after they have started their enterprises, and suggestions as to how we can improve and expand the coverage of the Job and Wealth Creation Scheme.

Finally, I commend the Office of the Chief Job Creation Officer for this maiden edition, which is quite informative and meets the highest production quality.

I wish our *YAGEpreneurs* and *STEPpreneurs* success and great accomplishments in life.

Senator, Dr. Ifeanyi Okowa

Governor, Delta State

and Provision of Jobs for
all Deltans

Meaningful Peace
Building Platforms
aimed at Political/Social
Stability

Agricultural Reforms
and Accelerated
Industrialisation

Relevant Health and
Education Policies

Transformed Environment
through Urban Renewal

Excitement as *YAGEPreneurs*, *STEPreneurs* Emerge

The first set of *YAGEPreneurs* and *STEPreneurs* are to be unveiled today January 14, 2015, at a passing-out ceremony at Songhai Delta, Amukpe, to be presided over by His Excellency, Senator, Dr Ifeanyi Okowa, the Governor of Delta State

A week-long training course on business management and entrepreneurship will herald the passing-out ceremonies, after which the 771 trainees (YAGEP 256 and STEP 515) will be equipped with starter packs to start their own businesses.

Their journey to success began on August 26, 2015 when the Governor inaugurated the Job and Wealth Creation Scheme, a.k.a OkowaPlus, designed to skill the youth of Delta, tackle unemployment and raise entrepreneurs.

Job and wealth creation activities started with the inauguration of the Ad-hoc Steering Committee on Job Creation by His Excellency, the Governor, and subsequently, the appointment of Chief Job Creation Officer in June 2015.

The existing job and wealth creation programmes include:

1. Youth Agricultural and Entrepreneurs Programme (YAGEP)

2. Skills Training and Entrepreneurship Programme (STEP)
3. Production and Processing Support Programme (PPSP)
4. Microcredit (administered by the Delta State Micro, Small and Medium Enterprise Development Agency).

Under YAGEP, unemployed youths are trained and established in their choice of agricultural enterprises, for example, poultry, piggyery, fishery and crop production. The scope of training covers agricultural 'subject-matter' knowledge, enterprise management, leadership and life skills, group organization and group farming. Both theoretical and practical agricultural training take place at accredited agricultural training centres over a given period, depending on the enterprise

STEP is designed to train and establish unemployed youths in preferred skills or trade for job and wealth creation. Under STEP, unemployed youths go through a three-phase training plan comprising life skills and orientation course, vocational skills training and business and entrepreneurship training. Currently, the skills or trades offered include computer hardware maintenance and repairs; catering and confectionary; electrical installation and repairs; barbing; bead-making; cosmetology, decoration and event management; hair-dressing and makeover; fashion

MILESTONES

- **June 10, 2015** – Setting up of the Ad-hoc Steering Committee on Job Creation
- **July 03, 2015** - Call for Participants for STEP and YAGEP
- **August 08, 2015** – Screening of applicants begins
- **August 26, 2015** – Formal Inauguration of YAGEP and STEP
- **Sept 03, 2015** – Formal Inauguration of PPSP, transfer of government purchased tractors to farmers' cooperative societies and commencement of the distribution of farm inputs to farmers.
- **January 14, 2016** – Passing out parade of YAGEP and STEP trainees.

design & tailoring; tiling; block moulding; Plaster Of Paris (POP) and interlocking.

The Chief Job Creation officer, Prof Eric Eboh expressed satisfaction at the success rate of the pioneer classes of YAGEP and STEP. "So far, only five cases of drop-out have been recorded. Three trainees are under suspension for truancy and indiscipline, one trainee left the programme to take up employment, while another trainee died in a motor accident."

According to Eboh, "the start-up kits vary across skill areas. YAGEP trainees will be provided with infrastructure and facilities, starter stocks (for livestock) and seeds/seedlings (for crop) and production inputs. On the other hand, STEP trainees will be provided with capital items relevant to the skill area and some working materials."

To ensure enduring success, Eboh said that "trainees will be monitored and mentored throughout the gestation period of their business enterprises. The monitoring and mentoring will be carried out through technical teams comprising specialists in the respective skills or trades. The mentoring process will involve the operation of business clinics for start-ups in order to ensure survival and stability."

LIST OF STEP TRAINEES (2015 CYCLE)

	SURNAME	OTHER NAME(S)	ENTERPRISE
1	ABAH-	FAVOUR UGONWA	CATERING & CONFECTIONARY

ADDRESS BY HIS EXCELLENCY, **SENATOR DR. IFEANYI ARTHUR OKOWA**, THE GOVERNOR OF DELTA STATE, ON THE INAUGURATION OF SKILLS TRAINING AND ENTREPRENEURSHIP PROGRAMME (STEP) AND YOUTH AGRICULTURAL ENTREPRENEURS PROGRAMME (YAGEP) ON WEDNESDAY, AUGUST 26, 2015, AT SONGHAI-DELTA, AMUKPE.

I gladly welcome all of you to this ceremony, the official inauguration of Skills Training and Entrepreneurship Programme (STEP) and Youth Agricultural Entrepreneurs Programme (YAGEP) of our Job and Wealth Creation Scheme.

2. Today's event is undeniable proof that our administration's S.M.A.R.T agenda is well and truly on course. It goes without saying that Job and wealth creation are the bedrock of the S.M.A.R.T agenda, with YAGEP and STEP as the flagship programmes.

3. Other programmes under the Job and Wealth Creation Scheme are Production and Processing Support Programme (PPSP), Development of Agro-Industries, and Extension of Microcredit. All the programmes have been strategically designed, stringently planned and specifically tailored to tackle the problem of youth unemployment and produce lasting and sustainable prosperity across board.

4. Our strategy for making this a reality is through focussed and concentrated efforts to stimulate the growth and development of Micro, Small and Medium Scale Enterprises (MSMEs). While multinational companies and big corporations get all the public attention and acclaim for their capacity to induce foreign investment capital, MSMEs remain the backbone for economic growth and social development in any society.

5. By definition, MSMEs are companies that employ less than 250 persons and available statistics indicate that 97% of all businesses in Nigeria employ less than 100 persons. Meanwhile, they account for about 50% of Nigeria's productive workforce and 46.54% of the Gross Domestic Product (GDP). The story is not different in other parts of the world. There are approximately 23 million small businesses in the USA and they employ more than 50% of the private workforce and generate more than half of the nation's gross domestic product (GDP). Similarly, MSMEs account for 99.8% of all companies and 65% of business turnover in the European Union.

6. It is for this reason that this administration is very passionate, deliberate and focussed in our quest to formulate tangible and lasting policies and/or programmes to support the small business sector. The

His Excellency, Sen. Dr. Ifeanyi Okowa, Governor of Delta State

overarching goal of the job and wealth creation scheme is to equip participants with the technical know-how, vocational/technical skills, values and resources to become self-employed and employers of labour.

7. I am aware that there have been similar interventions in the recent history of our State. Unfortunately, these interventions did not deliver on their promises and, therefore, failed to meet the yearnings and aspirations of our people. Not surprisingly, some people have wondered if we are not just reinventing the wheel or going through the same motions without movement. My answer to that is a resounding NO! We carried out a thorough post-mortem of past initiatives in this regard and designed the Job and Wealth Creation Scheme to avoid their shortcomings.

8. The underlying difference is the desired end result. While previous programmes sought to prepare people for employment, the Job and Wealth Creation Scheme seeks to produce wealth creators and job creators. Critical

differences also exist in the selection and screening process, training approach, management system, and collaboration with the organised private sector. In addition, this scheme is not your typical empowerment programme that is often cash based; it is a wealth and job creation scheme. It is not about skills acquisition; it is about building a knowledge economy.

9. The youth training and development is all encompassing and enduring in nature. It incorporates life skills, mind-set change, leadership and business management skills necessary for our participants to become successful entrepreneurs. To avoid the pitfalls of the past, a monitoring and mentoring mechanism has been incorporated into the scheme to track performance of participants and provide them counselling when necessary. Monitoring is aided by ICT-based information transmission, tracking and reporting technologies. This is expected to greatly reduce the number of drop-outs from the scheme, a major drawback with previous programmes

10. It is important for us to recognise these differences so that we can embrace the paradigm shift that the job and wealth creation scheme entails. And this is particularly so for our participants here today. I congratulate all of you for making it into the scheme. Beyond the colour and glamour of the day, I want you to know that this scheme is about taking your destiny in your own hands. It is an opportunity of a life time and I urge you to make the most of it.

11. Becoming an entrepreneur or a self-employed person is not a big deal neither is it rocket science. It is within reach of any person who will dare believe and go for it. Most successful entrepreneurs were not born; they were made. Or to put it another way, they made themselves. They made themselves, of course with the help of God, because they braved the odds and applied themselves rigorously to some of the things you will be learning in the course of your training.

12. You will be taking courses in leadership, personal effectiveness, resource management, and problem solving, among many other modules, to be facilitated by thoroughbred professionals and experienced resource persons; men and women with proven track records of success in business and leadership.

13. After This Orientation Programme, you are expected to proceed to various skills training centres to obtain the requisite necessary technical/vocational skills after which you will embark on an internship in an existing business set-up in your chosen field. The last week of your training will bring you back here to SONGHAI-DELTA for a rigorous and robust education in entrepreneurship and business management. Graduates will then be given starter packs to start their businesses.

14. The government is investing hugely in this programme and you will be doing yourself, your family and your community great disservice if you squander this opportunity. Training to become an entrepreneur

gives you a headstart over some of your friends and colleagues in paid employment. Every employee, whether in the civil service or the private sector, will eventually retire into private business and God help that person who is not adequately prepared for life after paid employment.

15. You should, therefore, consider yourselves privileged to be getting the kind of training you have been receiving since the commencement of this Orientation Programme. Indeed, you are blessed and highly favoured to have been selected from a pool of over 70,000 applicants to commence this scheme. I expect you to make the most of this opportunity by diligently applying yourself to the training programme.

16. As forerunners of the Job and Wealth Creation Scheme, I charge you to be good ambassadors. You must lead by example and imbibe the qualities of discipline, focus, punctuality, hard work, and accountability that constitute the ingredients for success in life.

17. As I pointed out earlier, this scheme has a strong monitoring and mentoring component throughout the enterprise gestation period. If you are found wanting at any point in time, you will be asked to step aside. We are very serious about this scheme and only those who show the same amount of seriousness deserve to continue to enjoy support from the government.

18. Within one year of your graduation from this scheme it is my earnest prayer and desire to see some of you prospering in your businesses and making progress in your personal life. Your success is our success. In the not too distant future, I am confident that some of you will be back here as resource persons for future phases of this Job and Wealth Creation Scheme.

19. The scheme is being executed in successive phases and I want to encourage those who could not make it into this first phase to remain hopeful. The introduction of this scheme has enabled us to develop a database of the unemployed in the State. By the next six months when the next phase begins, we will simply pull out the next set of participants from the database. So there is opportunity for as many as are qualified to be enlisted in subsequent phases of the scheme.

20. Once again, congratulations to all of you participants, and I pray for your success in this journey.

21. I thank you all for listening.

22. God bless you.

23. God bless Delta State.

Beneficiaries Speak

As a package of support for driving prosperity for all Deltans, the OkowaPlus scheme and its component parts have proven that the election manifesto and promises of Governor Ifeanyi Okowa, were not just words of mouth, but a passionate and determined vision to tackle unemployment and create sustainable wealth for Delta State and its citizens. Below are testimonials of some of the beneficiaries.

AUTHENTIC OJUWA, 31 years
Obiaruku, Ukwuani LGA,
STEP (Computer Repairs)

For my training, I am specialising on computer hardware repairs. We have been taught computer appreciation and software. Now we are on hardware assembling and repair training, and without knowledge of software you cannot repair hardware. We have been taught about the basic input-output system, BIOS, a major component of the computer system without which a computer cannot be booted. The benefits of this programme cannot be over-emphasised. For the first time in Delta state, we are seeing a programme that is availing the youth the ultimate opportunity to be involved in job creation for the society to help the government create employment and reduce unemployment to the barest minimum. It is good to know that we have somewhere to go to for training, while we also receive monthly stipends from the Government.

For the first time in Delta state, we are seeing a programme that is availing the youth the ultimate opportunity to be involved in job creation.

LOVETH OMOWURHERI, 29 years
Kpokpogri, Okpe LGA,
STEP (Catering)

I am training as a caterer in the STEP programme, and I have benefitted a lot. I have learnt how to bake cakes, manage and plan events and so many other things. This programme has impacted my life in many positive ways, and I know that after this training, I am going to establish myself in the business world. Even now that I'm still in training, somebody saw a cake I baked and called me to bake a cake for them, and I told them that I don't have an oven to bake cakes. My dream has always been to be a well-known caterer and own a good catering centre where I can teach people and impact on their lives positively. Right now, I am bold enough to say the STEP programme is helping me achieve my dream.

Right now, I am bold enough to say the STEP programme is helping me achieve my dream.

SUOWEI FELIX, 31 years
Kiagbodo, Burutu LGA,
STEP (Electrical Installation)

One major thing I have benefitted from this programme is knowledge. It has equipped me for the future, it is a foundation that has been laid and that I will work upon. It is a great privilege that I am one of those benefitting from this programme today and it is an honour and opportunity that God has given that I will make good use of. It has also offered me the opportunity to relate more with Delta youths, be more familiar with people and be a good leader. I know greater opportunities are still coming under this programme, so I rate this programme a hundred and twenty percent over hundred.

This programme has impacted my life positively, especially in the area of acquiring a skill and making use of the skill, because this has been one of the major things affecting Delta youths. I am undergoing training in Electrical installation and repairs and I thank God for our Instructor who is patiently and gradually imparting knowledge into us. Today, I know the different types of wires, knockout boxes, a lot of electrical materials and safety in electrical works. Right now, I am part of a team wiring a house. I have always had passion for electrical work, so I'm happy with this training.

SOPHIA OGHENEORUCHE
EMORE, 33 years
Ethiope East LGA
STEP (Cosmetology/Beauty Therapist)

I have learnt a lot about taking care of the skin, pedicure, manicure, removing of body hair called waxing and fixing of eyelashes. We have been taught how to manage our time well and also how to manage our business and equipment in our Spa so that they don't go bad. We started practical this week and it was very interesting, we did waxing; how to remove hair from the legs and armpits and how you can

This programme has impacted my life positively, especially in the area of acquiring a skill and making use of the skill.

I am so happy to be among the people chosen, and I look forward to starting my own business and training other people in my Spa.

shape your eyebrow with waxing, remove chest hair and beard.

Next week we will have pedicure and manicure practical. I am so happy to be among the people chosen, and I look forward to starting my own business and training other people in my Spa. I have always been passionate about facials, body polish, beauty therapy and skin treatment, so I feel blessed to be here.

DANIELSON CHUKWUYEM,
27 years
Agbor, Ika South LGA,
YAGEP (Poultry)

Right now I can boast that I am an Entrepreneur and can train other trainees in future.

It has been a beautiful experience. We are being trained on what we are specialising on. My area of training right now is poultry farming. We are made to practice what we are taught in the one month, fifteen days we spent in Songhai. The next one month and fifteen days will be an internship in any farm close to your local government area or your residential address. It has to be farms with mechanised structure. This training has availed me the opportunity to know in detail, what is required of me to run poultry, vaccination and so many other control measures.

In terms of impact on my life, I would say I will not talk about poultry from face value anymore, because right now I can boast that I am an Entrepreneur and can train other trainees in future. The beauty of the training we got from Songhai is that every Wednesday, we do a round table talk on other fields, like crop farming, fishery, piggery, animal husbandry, so that we can have an idea of other areas and possibly diversify.

STANLEY IDIETAKARE, 29 years
Oshimili South, Delta North
YAGEP (Poultry)

This programme has impacted on me very positively, because it cuts off the stress of searching for a job, and positions me as an Entrepreneur who will create jobs in a short time for other people out there.

This programme has benefitted me in many ways in relation to the training we just concluded at Songhai. I have gotten some skills and much needed experience from the training exercise in Amukpe, Songhai. I want to appreciate the Governor, Dr. Ifeanyi Okowa for this programme. It is a very good thing, because it is creating job creators not job seekers. This programme has impacted on me very positively, because it cuts off the stress of searching for a job, and positions me as an Entrepreneur who will create jobs in a short time for other people out there.

OTUISI LOUIS, 32 years
Kunukunuma, Warri South West LGA
YAGEP (Poultry)

At the introductory session, we had different speakers who took us on effective time management, how to manage your business and how to take responsibility for your life. The first session was organised to build our minds. We were made

to understand that our life and destiny lie in our hands despite the fact that the Delta State Government is working to assist us. I personally learnt a lot on how to utilise my time well. I also learnt how to take responsibility for my life and that it is expedient and very important for me to start up a business of my own.

We were taught integrated farming, which equips us for various enterprises in agriculture, namely; fishery, poultry, animal husbandry and crop production. One lesson that I hold strong from this programme is, taking responsibility for projects committed to your trust. We must be responsible to this project; the responsibility doesn't lie with the government alone but on us who are undergoing this training to make them proud of spending their time and money on us. Basically, I have learnt so much that I cannot express it all.

One lesson that I hold strong from this programme is, taking responsibility for projects committed to your trust.

PHILIP OJADA, 27 years
Isoko South LGA, Delta South
YAGEP (Fishery)

For me o! The Governor tried for packaging this kind of programme for the youth. It is a good thing to see that the Governor has the youths in his plans and in his mind. His "Prosperity for all Deltans" slogan during the elections is a confirmed truth. For me, this programme is a stepping stone and I am happy to be among the people benefitting from it right now. My area of training now is fishery and it has been a beautiful experience, so I will rate this programme 98%. I am very grateful to God, the Governor and every other person who is a part of putting this programme together, because I feel lucky to be a trainee in YAGEP. The fact is Governments have come and gone, and I have never gotten an opportunity like this before. Now, by tomorrow, with God on my side, I can establish myself and start something from what I have learnt so far. I am grateful to the Governor and his team.

His "Prosperity for all Deltans" slogan during the elections is a confirmed truth.

MRS LIZZY AKHERE
PPSP (Zion Multi-Purpose Co-operative Society, Warri)

On our own, we've been struggling farmers for a long time, but since our son, Governor Okowa came into office; he has transformed the farming system for us. Right from the beginning, he promised to make this land a fertile ground for us, and from what we are seeing, he has kept to his promise. He told us that he would make farming an enviable profession for us.

Actually we applied for tractors and he told us that he would pay sixty percent of whatever the tractors cost while we would pay the remaining forty percent. We thought it was a dream, until the tractors were given to us. I am very

grateful to God because, out of the 900 Co-operatives that applied, my Co-operative got these tractors. The keys to the tractors were given to me by the Deputy Governor. Even then, it did not just end there. The Job Creation Officer and his team have been all over the place, training and retraining us on the handling of the tractors. Tomorrow we will go with our Drivers to where they will be trained on use and maintenance of these tractors. Also, before now, we used to farm on small lands, but with these tractors, we can go into extensive farming that will provide employment for our children, generate funds for better living and empower families and the community as a whole.

MR NWAEBI ALFRED
PPSP (Onyemeyeibe Multi-Purpose Co-operative Society, Owa-Alero, Ika North East LGA)

We are benefitting much from the PPSP Tractorisation Scheme. We thank God for Governor Ifeanyi Okowa and his wisdom. Our Co-operative has received two tractors and the Government is building a Garri mill for Onyemeyeibe and the same at Owa Alero. Since we got the tractors, people have been trooping in from all over to see them. The community is happy.

These tractors which were given to us at a very subsidized rate will help us greatly in terms of labour and expanding our farming. Right now, jobs have been created because of these tractors. As I am speaking to you, we have employed six persons; one person in the office, one supervisor, two tractor drivers and two assistants to the drivers.

Another boost to our efficiency and scope of operations is the training we are receiving from the Job Creation Officer and his team. I read the hand-notes they shared to us from front to back. Now, our palm-fruits, yams, cassava and melon farms should do better. Until we got the tractors, we never knew we had tractor drivers in our community. When we advertised vacancy for tractor drivers, six people applied almost immediately. So, we pray that our farms expand, to be able to employ more people.

Before now, we used to farm on small lands, but with these tractors, we can go into extensive farming that will provide employment for our children.

As I am speaking to you, we have employed six persons; one person in the office, one supervisor, two tractor drivers and two assistants to the drivers.

VEN. DR. JB UTOMAKILI
PPSP (Oleh Diocesan Multi-Purpose Co-operative Society Ltd, Oleh, Isoko South LGA)

The benefits of this Tractorisation Scheme are many in the sense that it becomes easier for individual farmers to make use of the tractors, because it is a difficult task for an individual to procure a tractor in the open market. Through the help of the government, individual farmers now have access to the use of tractors and this will promote increased production of agricultural products.

Tractorisation will most definitely increase farm size, we will produce more and automatically we will sell more. That means the marketing sector will generate employment. Also, there will be a need for people who will maintain these tractors. So, it's clear there will be multiplier effects in relation to job creation.

SYLVA EJEZIE, Rice farmer based at Omelugboma Oko Road, Asaba:

I am one of the farmers whose farmlands is being used for demonstration under the partnership between the state government (through the job creation office and ADP) and Syn-genta Agricultural Company.

Under the training and demonstration programme, we were taught new skills in rice and tomatoes production. We learnt new and better practices and techniques in planting, soil and crop management for increasing crop yields.

I am happy to report that I have got 7 metric tonnes of rice per hectare compared to 2.7 metric tonnes before the training. Today, I am in the job creation office to show the rice output from the training programme. I have tagged it 'Delta Rice', as a way of spreading awareness of the possibilities of producing rice in Delta State.

Also, I am one of the beneficiaries of the PPSP component of the job and wealth creation scheme of the state government. I received 30 bundles of vitamin A fortified cassava stems, four bags of fertilizer and cash component of forty-five thousand naira.

I thank the Governor of our state and the job creation office for helping farmers without disappointment, as was the case in the past.

'OkowaPlus is a Lifetime Opportunity'

- Prof. Eric Eboh

One of the first actions of Governor Ifeanyi Okowa upon assumption of office on May 29, 2015, was the creation of the Office of the Chief Job Creation Officer to act as a catalyst for the job creation component of the S.M.A.R.T agenda.

Two months later, the Job and Wealth creation Scheme was launched. The Scheme has the following programmes:

1. Youth Agricultural and Entrepreneurs Programme (YAGEP)
2. Skills Training and Entrepreneurship Programme (STEP)
3. Production and Processing Support Programme (PPSP)
4. Microcredit (administered by the Delta State Micro, Small and Medium Enterprise Development Agency).

*We spoke with the Chief Job Creation Officer, **Prof. Eric Eboh**, on the journey so far.*

Give us a brief summary of OkowaPlus

OkowaPlus is a package of support for driving prosperity for all Deltans. It is the totality of the S.M.A.R.T Agenda. As we very much know, during the electioneering campaigns, His Excellency, Senator, Dr Ifeanyi Okowa promised prosperity for all Deltans based on the strategy of the S.M.A.R.T Agenda. The totality of the S.M.A.R.T Agenda is job and wealth creation, and the logic is that, it is through job and wealth creation that prosperity for all Deltans can be achieved.

The Job and Wealth Creation Scheme which encapsulates OkowaPlus is multi-dimensional. We have various programmes running under the scheme. We have the Youth Agricultural Entrepreneurs Programme (YAGEP), Skills Training and Entrepreneurship Programme (STEP), and for existing Farmers and Agro-Processors, we have the Production and Processing Support Programme (PPSP). Of course there is the

Micro-Credit Programme to provide small loans and micro-credit to the critical mass of the population, artisans, market women, co-operative societies, traders and farmers.

There is another component of the Job and Wealth Creation Scheme which relates to Agro-Industrialization and the objective is to drive the economy of the state from the point of comparative advantage in many commodities. Delta State has comparative advantages in many commodities, including oil palm, cassava, vegetables and many other livestock enterprises. The strategy is to mobilise public and private investment in the downstream sector of the agricultural value chain as a means to stimulate production and investment in the upstream sector, particularly in agricultural production which will eventually create jobs for the youth.

What criteria do you use in selecting participants for training?

We have a number of criteria for selection into YAGEP and STEP. First, you must be between the ages of 18 to 35. Secondly, you should have a minimum qualification of West African School Certificate. There is also an interview and screening process and then a ranking of the performance of the candidates according to various factors; willingness, readiness to become self-employed, by making personal enquiries. Our selection process is rigorous and all-inclusive. The information and application forms are accessible to anyone who desires to be a part of the programme, provided you are a Deltan, be you male, female or physically challenged.

If one doesn't have a WASC, but has the passion, what becomes of him or her?

We encourage people to have a minimum of WASC. This is the 21st century. We expect that the Deltan should at least, have this minimum, basic qualification and if not, there are opportunities for such candidates to achieve basic literacy that is required for any enterprise. Also the state government is promoting Universal Basic Education, so we advise and encourage people to take advantage of it.

So, how many jobs have been created so far and how many people are being trained?

Currently, we have a total of one thousand, three hundred and thirty five trainees. This includes trainees under YAGEP and STEP. In addition to this, we are targeting one thousand Farmers (primary producers) and also one thousand, five hundred agro-processors. This is the maiden edition and according to His Excellency, the Governor of Delta state, this programme will run in cycles. What we are witnessing right now is the first cycle of the programme. The second cycle will run when the first cycle ends, hopefully by February next year.

Is OkowaPlus supported by Multi-lateral agencies?

One of the things we are doing under these programmes is to leverage on development partners' support. There are a number of facilities and funds available in the international development community for youth development, entrepreneurship development, supporting poverty alleviation, and community and women empowerment.

We are taking measures to leverage on these facilities; a number of them with UNDP, with the UK's DFID and also with the German Technical Co-operation. We want to establish some basis within the programme then we will commence constructive dialogue and engagement with these agencies for partnership, collaboration and support in different dimensions. It is not just about funding, they can give us technical assistance in the area of improving upon the

The programme is structured to succeed. We tell the trainees that any youth that goes through this programme will only fail by choice.

programme, in the area of monitoring, evaluation and system enhancement for the programme.

We are going to be seeking technical assistance as well as financial assistance. The financial assistance we are going to seek will be targeted at expanding the scheme because the state government cannot achieve all that it wants to achieve due to limited financial resources. So we need financial complementation from these agencies to upscale our coverage to include more Deltans and more

trainees into the programme.

How can Deltans in diaspora benefit from OkowaPlus?

Diaspora Deltans can benefit by partnering with OkowaPlus. We have a lot of Diaspora Deltans, highly skilled, competent and capable, looking for credible platforms to partner with. So, the Job and Wealth Creation Scheme which is run by the office of the Chief Job Creation Officer provides a very credible and legitimate platform for Diaspora Deltans to come home and make their impact felt and also benefit in terms of value sharing.

We are going to be drawing largely from Diaspora resources in terms of expertise, funding and networking.

What challenges have you faced so far?

A major challenge we faced from day one is data...credible data to target our support packages. One prerequisite for any target scheme is the right data. You must know who the target is and other attendant elements. For example, we are targeting the unemployed, "who is the unemployed?", "where is the unemployed?", "what does he/she do?", "what does he/she want?" We had to build our own database from the scratch.

The same goes for farmers too. You want to target farmers with input, with technical assistance, with credit but "who are the Farmers?", "where are the Farmers?", "what do they want?", "what do they do?" We have been able to resolve this challenge by building our own database, getting the relevant expertise to develop templates and collect information from a variety of sources, and feeding the information into the database.

So, one can confidently say today, for the first time since Delta State was created that we have a reasonably credible database of Delta State farmers. It is a milestone that we have achieved. Secondly, we have a database of the unemployed. It is a living database because we keep on updating it and during the next cycle, we'll upgrade and upscale it. This has provided us with a very big opportunity to know who actually needs this support.

We are facing logistic challenges in terms of dealing with more than one thousand trainees scattered in one hundred and nine centres all

over the state. We have to pay them, monitor them and also open up lines of communications for effective monitoring via social media networks. We have a Networking Desk Officer in the office of the Chief Job Creation Officer, who anchors interaction with trainees from different parts of the state. We believe these trainees can be change agents; they can be advocates for a better society. We want to harvest their positives, and get them to be more constructive, more personally responsible and develop leadership skills.

The way the programme is structured, the first one week was devoted to life skills training at Songhai Delta, Amukpe. Topics such as personal effectiveness, problem solving, time management, leadership and success drivers were taught. This will be followed at the end of the programme by one week devoted to entrepreneurship and business management training. This will end with the development of business plans by every trainee, which will be the basis for the takeoff of their various enterprises.

Are the participants' fast learners?

Yes, the participants are enthusiastic, ready to learn and are highly self motivated. The programme is structured to succeed. We tell the trainees that any youth that goes through this programme will only fail by choice. We have put in measures to ensure that we come out with products that we can be proud of. We call them the OkowaPlus Ambassadors. We brand those under YAGEP as *Yagepreneurs*, while those under STEP, we call *Stepreneurs*.

With your experience in International Development Agencies and top government organisations, why did you accept to work with the Delta state government?

I believe in the leadership qualities, the passion, the mission, the conviction, the sincerity and honesty of His Excellency, Dr Ifeanyi Okowa. I believe he is somebody on a mission, and I am very glad to be a part of his missionary team for the state. I believe in what he can do and he is a man of destiny for this State, and I think that Deltans should be grateful to God for having such a man. He is a man of many

wonderful features and the leadership capacity to work and to listen. He is a large hearted man also.

Secondly, I see myself on community service. What is life without the ability to influence matters for the benefit of people? What gives me joy is that we are producing results, so when I see the youths happy and enjoying the programme, I am happy. The other day I went to one of the centres in Asaba here, and was overwhelmed by the welcome I received. They were happy. When we handed over the tractors to farmers in this state, a big milestone, a lady who was handed the tractor key by His Excellency, could not hold herself, in disbelief and excitement. People had to hold her.

Right now we are undertaking input distribution to one thousand farmers in the state. Distribution is going on of day-old chicks, feeds and medication to poultry farmers; growers, feeds and medication for piggery farmers; fingerlings, feeds and medication for fishery farmers; stems, fertiliser, cash support for cassava farmers, seedlings for tomato farmers etc. The best way to appreciate the impact of the whole exercise is to see pictures of the farmers. They are all so excited; they are in a state of disbelief. That, to me is enough justification for being here.

Advice to Participants and aspiring youths out there

My advice to them, which I have always communicated to them anytime I have the opportunity, is that they should not miss this opportunity. It is a lifetime opportunity. The programme has been structured through rigorous thinking. There is a standing committee made up of committed, passionate, hardworking Deltans which has worked on this programme to produce the blueprint and the design of the programme. The least that any youth in this programme can do is to reciprocate this gesture by getting the skills and putting it to use for a reasonable livelihood. What is required of the youth is to take full advantage of the opportunity so that the public investment in this programme can be justified.

INTERVIEW BY **LOVETH ANGOZI**

THE JOB CREATION ACCOUNTING FRAMEWORK

Shortly after the inauguration of the current administration in Delta State, His Excellency, Governor Ifeanyi Okowa established the Office of the Chief Job Creation Officer (CJCO) as a vehicle to fast track the ultimate realization of the objective of job and wealth creation; a key component and connecting thread of the other components of the Smart Agenda. The Office of CJCO was created to manage and coordinate the job and wealth creation schemes of the Okowa led administration.

Evidently, the number of jobs created, directly or indirectly, through the programmes and initiatives of the Office of the CJCO or through the programmes and activities of Ministries, Departments and other Agencies (MDAs) is a major Key Performance Indicator (KPI) of the administration, hence the need for procedures, benchmarks and common definitions for appraising and taking stock of the gains and achievements in terms of the number and types of jobs created by Government.

As part of its mandate, which includes the design of a framework for measuring and documenting the job creation efforts of government, the Office of the CJCO has, in consultation with the Ministry of Economic Planning and the Office of the Senior Policy Adviser, designed the Job Creation Accounting Framework (JCAF) for adoption and implementation by MDAs and it was approved by the State Executive Council.

The JCAF is a tabular array of the types and numbers of jobs attributable to the projects or programmes of any MDA. The essence is to ensure uniformity, credibility, reliability, accuracy and orderliness in the management of statistical data on job creation. It will also enhance institutional memory and promote inter-agency coordination in the development of cumulative scorecards for the periodic monitoring of job creation efforts of government.

STEP and YAGEP Trainers Speak

ENGR. SUNDAY ALABA NIKORO, Managing Director, Shelterdenas Investment Ltd, Orhuwunrun Road, Udu:

“The skill acquisition programme of the Senator Ifeanyi Okowa-led administration is one of the best things to happen in Delta State in the recent past. The fact that it took off immediately the administration came on stream is a clear indication of the direction of the current government; which is to enhance the lives of the people of the state. This singular bold initiative has the potential of reducing unemployment to a very minimal level in our state. I give kudos to our amiable governor, His Excellency, Senator Ifeanyi Okowa. I pray God will continue to protect and direct him to do more for Deltans.

“For the trainees, they have been wonderful and hard working. What we do here is for serious minded people. And I am bold to say that the four persons under our apprenticeship have done well. They now have the practical knowledge on how to fit tiles, and of course, other technicalities involved in the business.”

MR. OGBAIDE OGHENERO, MD Airmax Electrical Engineering Services, Ozoro, Isoko North local Government Area:

“This job and wealth creation initiative of Governor Ifeanyi Okowa has indeed opened our eyes to the fact that seeking white collar job is no longer fash-

ionable. In fact, it is no longer feasible if we truly desire to create a sustainable future for our people. That is why every right thinking person should wholeheartedly support the current administration's drive to take our youths off the streets and give them a better future. I only hope the programme is sustained, as it has the potential to reduce unemployment in the next few years.

“The response and attitude to work of the two trainees with us have been very encouraging. They have shown determination to learn. As you are aware, we are into electrical fittings and installations. We have taken them through the various stages, and I can tell you, they are good to go. I want to really commend the Delta State Governor, Senator Ifeanyi Okowa for this wonderful opportunity being presented to our youths. May God bless him.”

MR. ISRAEL ARENIMINU, owner of Arsrel Computer Services, Oleh, Isoko South Local Government Area:

“Sincerely, the Delta State government has done well in redirecting the attention of our youths to acquiring skills that would help them build a better and fulfilled future for themselves. With this alone, our governor has demonstrated his passion for the growth and development of Delta State. He has also shown that he is a leader who believes in the sustainable empowerment of the people, particularly the youths.

“The trainees are doing well. We didn't have any problem getting them to do what they came here for. Their willingness to learn manifested in their punctuality and level headed disposition. In all, the state government should be commended.”

MRS LUCKY OTALEKOR, Proprietor of Ivygold Concept, a Catering and Confectioneries outfit in Ajamighogha, Warri:

“We have not really had this kind of broad and genuine across-the-board job and wealth creation exercise in Delta State. What the state government is doing is really encouraging. This initiative has enamoured a new spirit of enterprise among

our youths, who before now had lost hope of being gainfully engaged in such a manner. The zeal with which many of them are doing their task showed they really welcome this empowerment programme. For me, it has given a renewed sense of responsibility to ensure that this administration succeeds in its effort to take Delta State to a higher level.

"The response and attitude to work of those the government attached to us is very satisfactory. Their commitment is good. Initially, few of the trainees were reluctant, but after a while they got adjusted and became more committed. I can say the four trainees have done well. I want to urge the state government to sustain the programme."

MRS FRANCA ALAEGBU of Chommy Confectioneries and Catering Services, Umuaji Street, Asaba:

"What the Delta State Government is doing as regards giving a better and prosperous future to our youths through skill acquisition is something every Deltan should be proud of. It is indeed unprecedented. I have never seen anything like what we are witnessing in Delta State. To know that government is completely responsible for their training and is ready to set them up is really amazing. What it means is that Governor Okowa is truly determined to create a better and prosperous Delta State. The Governor is indeed living up to his promise of ensuring prosperity for all Deltans.

"Our trainees are doing well. Though very few out of the 28 persons have not really shown enough seriousness, but quite frankly, it has been good. These beautiful cakes you are seeing were baked by one of the male trainees. In fact, some of them have started baking cakes and confectioneries for people. What the government is doing to empower our people is a thing of joy for me."

MRS OMANUFE ODUOSA, MD Imamofe Crafts, along Nnebisi Road, Asaba:

"This skill acquisition programme of the Delta State Government headed by Senator Ifeanyi Okowa, is a big relief and welcome development. It is clear departure from the past when monies were given to people without recourse to how it should be applied. What we are having today is practical. I have interacted with many of the participants and discovered they are highly enthusiastic about the programme. They acknowledged the sincerity of the Governor in bringing prosperity to all Deltans. Many of them praised the transparent process that led to their emergence as participants because they didn't have any godfather, but were pleasantly surprised when they were chosen to be part of the programme.

"When we commenced the training, two of the four trainees did not show much interest, but after a short while they realised the importance of the exercise. Since then, it has been very wonderful and encouraging. Some of them have started getting their own clients requesting them to make jewellery for them.

MRS BLESSING AGUNZE, of Ruth and Boaz Capacity Building Centre, DBS Road, Asaba:

"I must admit that the current administration in Delta State led by Senator Ifeanyi Okowa has started well, especially against the backdrop of its focus on getting our youths off the streets through purposeful and deliberate effort to not only get them gainfully engaged, but hopefully make them employers in the near future. I only urge the government to maintain the tempo. It is a step in the right direction. What they are doing is akin to teaching our people how to fish.

"I can say that 85% of the 15 persons attached to us were really interested in learning. Having had one disappointing experience or the other in the past, the participants are full of praise and prayer for Governor Ifeanyi Okowa. Initially, they were sceptical until they went to camp and had a wonderful experience there. According to them, they were well taken care of. That fired their interest, and since then they have not looked back."

Progress and Outlook of Delta State Government's Job Creation Scheme

1.0 INTRODUCTION

His Excellency, Senator Dr. Ifeanyi Okowa, Governor of Delta State envisions Prosperity of All Deltans through the SMART Agenda, of which job and wealth creation is the crisscrossing thread.

The objective of the job creation scheme is to train and establish unemployed youths, aged 18-35 years, in various vocational skills, to become entrepreneurs, managers and leaders. The strategy of the job and wealth creation scheme is to put resources (particularly, skills and productive assets) in the hands of unemployed youths and thereby empower them to become employed, employers of labour and create wealth.

The job creation scheme is implemented in multiple programme streams, as follows:

- Youth Agricultural Entrepreneurs Programme (YAGEP);
- Skills Training and Entrepreneurship Programme (STEP);
- Production and Processing Support Programme (PPSP); and
- Microcredit, administered by the Delta State Micro, Small and Medium Enterprise Development Agency.

2.0 PROGRESS OF IMPLEMENTATION

Number and characteristics of applicants: In the 2015 programme cycle, close to 70,000 applications were received and the applications have been processed into a database of youths in Delta State. The applicants were composed as follows: WASC holders 56%, OND 16%, HND 7%, Bachelor's Degree 16% and others 5%.

Out of the total 70,000 applicants, only 1329 applicants (that is, 2%) were selected for the 2015 programme cycle. The profile of trainees in the 2015 programme cycle is as follows: Bachelors/HND 51%, OND/NCE 17%, WASC 23%, others 9%. The selection was done through successive layers of prequalification screening, oral interviews and merit-based selection techniques.

Training design - there are three successive mutually-influencing stages: Stage 1: Life skills and re-orientation training; Stage 2: Vocational skills training (instruction and practical) and internship in live enterprises; and Stage 3: Business management and entrepreneurship training.

Establishment after training: Successful trainees will be supported to establish and run their own enterprises through the provision of starter packs which in the case of livestock enterprises include livestock houses, operating facilities, amenities and inputs. In addition, participants receive buffer stipends during the enterprise gestation period and some working capital to purchase inputs and/or working materials.

Mentoring after establishment: In order to ensure the success and sustainability of trainees, there is a follow-up mentoring plan. Under the mentoring plan, mentoring teams comprising practitioners and specialists in the respective enterprise categories will run real-time business clinics for start-ups. The mentoring process will be facilitated by the use of toll-free GSM lines for communication and feedback with YAGEPreneurs and STEPneurs.

On completion of the programme, YAGEP trainees will be branded and promoted as YAGEPreneurs and STEP trainees as STEPneurs. The branding is essential to dignify the trainees, distinguish the programme and tag performance over time.

Creation of Database: One major indirect first-fruit of the job creation scheme is the creation of database of unemployed youths in the state, showing their telephone numbers, educational qualifications and communities/towns.

Similarly, we have created a database of farmers showing names of farmers, types of farm enterprises, size of farm enterprises, physical and geospatial location of farm enterprises and telephone numbers. The database of farmers is unique in the sense that it is based on physical verification of farms. It is available for use by other ministries, departments and agencies for their respective purposes.

Monitoring and Feedback: THE job and wealth creation scheme has in-built monitoring, tracking and feedback (MTF) mechanism. The monitoring and tracking takes place in multiple layers of internal and external monitoring. An action plan for monitoring and tracking is being implemented to ensure timely and adequate feedback as the basis for programme control. The monitoring plan involves collecting and reporting information and data on pre-determined key indicators of programme-specific outputs, outcomes and impacts. Examples of the indicators are quality of training, discipline of trainees, quality of products developed by trainees, proficiency of trainees, retention (or inversely, drop-out) rates of trainees, business start-up rates among trainees, enterprise survival rates among trainees and self-reproduction rates among trainees.

Internal monitoring by programme staff and external monitoring (by independent monitors) are currently underway for the three programmes – YAGEP, STEP and PPSP. External monitoring is carried out by independent monitors through scheduled and instant checks on training centres in the three senatorial districts. Also, the programme is using a two-directional monitoring system to ensure checks and balances and promote mutual accountability of implementers and beneficiaries. Under the reciprocal monitoring system, training centres sent regular assessment feedback on their trainees and vice versa.

3.0 PROGRAMME-SPECIFIC ACHIEVEMENTS

Youth Agricultural Entrepreneurs Programme (YAGEP)

The 2015 programme cycle has 256 YAGEP trainees, consisting of 190 males (74%) and 66 females (26%). The enterprise distribution of the trainees is as follows: poultry 134 trainees (52%), fishery 84 (33%), pig-gery 20 (8%) and crop farming 18 (7%). YAGEP trainees have completed internship for practical hands-on life enterprise experience. A total of 40 private farm establishments were used as internship centres.

Skills Training and Entrepreneurship Programme (STEP)

The 2015 STEP programme cycle has 1073 trainees, consisting of 667 males (62%) and 406 females (38%). There are a total of 116 STEP training centres across the state. The training centres are selected based on capacity, functionality, accessibility and availability. The skills covered are computer hardware maintenance and repairs; catering and confectionary; electrical installation and repairs; barbing; bead-making;

cosmetology, decoration and event management; hair-dressing and makeover; fashion design & tailoring; tiling; block molding; Plaster of Paris (POP) and interlocking. The most preferred skills among the male participants is computer hardware maintenance and repairs followed by electrical installation and repairs. Among the female participants, the most preferred skill is fashion design/garment making followed by event management & decoration and hair dressing/makeover.

Production and Processing Support Programme (PPSP)

PPSP is being implemented in three dimensions:

- i. Support for tractor ownership and operation by farmers' multipurpose cooperative societies;
- ii. Provision of subsidized support packages to smallholder farmers; and
- iii. Support for the ownership of agroprocessing mills by farmers' multipurpose cooperative societies.

Support for tractor ownership and operation by farmer's multipurpose cooperative societies: Under the tractor programme, a total of 34 tractors with accompanied set of implements have been allocated to 22 farmers' multipurpose cooperative societies. Cooperative societies were rigorously screened to ensure that only the credible and capable ones received the tractors upon down-payment of 10% of their cost share of 40%.

Provision of subsidized support packages to smallholder farmers: The support packages cover cassava, poultry, piggy, fishery and tomato. The packages comprise critical inputs including seeds/cuttings and fertilizer for crops and starter stocks and feeds for livestock and fisheries as well as cash grant to pay for labour operations. The inputs are delivered at the farmers' farms throughout the state.

On the whole, the support packages are reaching a total of 1000 farmers comprising 450 cassava farmers, 100 poultry broiler farmers, 50 poultry layer farmers, 100 fishery farmers and 46 tomato farmers.

Support for the ownership of agroprocessing mills by farmers' multipurpose cooperative societies: In line with the value chain approach to commodity development, this programme component provides 'matching capital' for farmers' cooperative societies to acquire agroprocessing mills, particularly, gari processing mill and palm oil processing mill. Palm oil mills (1nos.) and gari mills (1nos.) are under establishment, as more farmers' cooperatives garner the requisite 10% down-payment of their cost share of 50%. The support for agroprocessing also includes the provision of two hundred and fifty (250) fish smoking kilns and two hundred (200) melon shellers, free of charge, to women groups and associations.

4.0 CHALLENGES IN IMPLEMENTATION

- The lack of data for accurate targeting. Adequate and credible database for the selection of beneficiaries reduce inclusion or exclusion errors. But, the lack of it increases the risk of improper and inaccurate targeting. The programme was faced with lack of data on unemployed youths and their characteristics.
- Huge logistics requirements. Programme implementation involves managing 1329 beneficiaries scattered in a total of more than 150 STEP and YAGEP training centres across the state. Close supervision entails huge monitoring costs and people management skills.
- Quality assurance. This requires finding good quality and willing training centres that meet the highest standards for theoretical and practical (hands-on) instruction.
- Initial public cynicism and poor perceptions arising from the failure of previous job creation programmes.

5.0 TRACKING OF GOVERNMENT-WIDE JOB CREATION ACHIEVEMENTS: THE USE OF JOB CREATION ACCOUNTING FRAMEWORK (JCAF)

'Job and wealth creation' is the crisscrossing thread of the SMART Agenda. So, the number of jobs created is the overarching Key Perfor-

mance Indicator (KPI) for the state government, now and in the future. Accordingly, this KPI is designed to capture jobs that are created, directly and indirectly, through the programmes and initiatives implemented by Office of the Chief Job Creation Officer as well as those created through the programmes and projects of other MDAs. Therefore, there is a real need to establish common definitions, benchmarks, template and procedure for appraising and stock-taking the total number of jobs created as well as the types and sources of the new jobs.

In this regard, the state government has adopted a Job Creation Accounting Framework (JCAF) for the measurement and tracking of job creation achievements. The JCAF is a tabular array of types and number of jobs attributable to any programme or project implemented by MDAs or in partnership with the private sector or non-governmental agencies. The JCAF functions as a unifying appraisal instrument that will ensure timely, accurate and complete feedback and data warehousing on the job creation achievements across MDAs. It ensures credibility, orderliness, accuracy, reliability and better management of statistical data on job creation. Also, it is intended that the JCAF will enhance institutional memory, promote inter-agency coordination in developing a cumulative scorecard for periodic checks on job creation across MDAs.

6.0 LESSONS FROM THE 2015 PROGRAMME CYCLE

- Selection of the right persons is key to success and sustainability. Transparent and open screening and selection process is the route to gaining public credibility and confidence of the beneficiaries.
- Monitoring and feedback are crucial to maintain discipline, quality assurance and effectiveness of programme delivery.
- Real-time communication with the beneficiaries is helpful for promoting networking, peer interaction and experience sharing among the beneficiaries.
- Dedicated government funding is an indispensable determinant of programme effectiveness and credibility.
- Coordination and collaboration with other relevant government ministries, departments and agencies is crucial to programme success and sustainability.

7.0 STRATEGIC PROGRAMME REALIGNMENTS AND OUTLOOK FOR 2016

The call for applications for the 2016 programme cycle is underway. In the light of experiences and lessons in 2015, the 2016 programme cycle will benefit a lot of improvements. They include:

- Deliberate realignment of emphasis to specific strategic skills needs of the state and job market realities;
- More structured screening and selection process;
- Strict matching of enrolment to qualifications of trainees;
- Enforcement of higher standards in training centres;
- Redesign of starter packs into two tied parts: (i) 'grant-in-kind' for critical capital items and (ii) matching 'microcredit' for production inputs or working capital; and
- Faster feedback system to enable programme self-correction.
- Explore and deepen partnerships and collaboration with international development partners, non-governmental organizations and private sector establishments.

OFFICE OF THE CHIEF JOB CREATION OFFICER
GOVERNOR'S OFFICE
ASABA

A Promise Kept

History is being made today as Governor Ifeanyi Okowa of Delta State unveils the first set of entrepreneurs of the Youth Agricultural Entrepreneurs Programme (YAGEP) and Skills Training and Entrepreneurship Programme (STEP) at a passing-out ceremony in Songhai-Delta, Amukpe.

Christened *YAGEPreneurs* and *STEPreneurs*, the budding entrepreneurs, who have been in government-sponsored training since August 2015 under the State's Job and Wealth Creation Scheme (a.k.a OkowaPlus), will be given Starter Packs to start their businesses.

Today's event is a fulfilment of the Governor's promise to tackle youth unemployment and combat poverty through entrepreneurship schemes encapsulated in the administration's S.M.A.R.T agenda.
